PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 85672

Title: Characteristics of amino acid metabolism in colorectal cancer

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 03479334

Position: Editorial Board

Academic degree: MD, PhD

Professional title: Chief Physician

Reviewer’s Country/Territory: Japan

Author’s Country/Territory: China

Manuscript submission date: 2023-05-09

Reviewer chosen by: Geng-Long Liu

Reviewer accepted review: 2023-06-15 23:46

Reviewer performed review: 2023-06-22 23:22

Review time: 6 Days and 23 Hours

SPECIFIC COMMENTS TO AUTHORS
This is a review article with several amino acid metabolism characteristics in colorectal cancer. I have the following comment. Regarding the location of the reference. Please move it to the end of the sentence, not in the middle of the sentence. When you are referring to more than one person, please add "et al". Ex) Li et al found that Gln deprivation…… → Li et al. found that …… CRC cells.

SPECIFIC COMMENTS TO AUTHORS

The authors reviewed the several specific amino acid metabolism characteristics in colorectal cancer. The manuscript is interesting but I think that the authors could improve the paper. 1) Why the authors did not evaluate also the impact of the amino acid metabolism in the treatment of CRC? 2) The discussion could be more detailed and well finalized 3) The language has to be improved 4) There are different typing errors, such as U.S. At present or limited. Clinically,
