

Supplementary Material

Supplementary Table 1: GATHER checklist of information included in reports of global health estimates

Supplementary Table 2: Mental diseases rate and number of DALYs, with 95% uncertainty intervals, by sex in 1990 and 2021

Supplementary Table 3: Mental diseases age-standardised rate and number of DALYs, with 95% uncertainty intervals, by location in 1990, 2019 and 2021

Supplementary Table 4: Age-standardised DALYs rate, with 95% uncertainty intervals, by mental disorder and location in 2021

Supplementary Table 5: Mental diseases age-standardised rate and number of DALYs attributable to risk factors, with 95% uncertainty intervals, by location in 1990, 2019 and 2021

Supplementary Table 6: Mental diseases rate and number of DALYs attributable to risk factors, with 95% uncertainty intervals, by sex in 1990 and 2021

Supplementary Table 1: GATHER checklist of information included in reports of global health estimates		
#	Checklist item	Section/paragraph/ interpretation
Objectives and funding		
1	Define the indicators, populations, and time periods for which estimates were made.	Methods / “Data Sources”
2	List the funding sources for the work.	Funding
Data Inputs		
<i>For all data inputs from multiple sources that are synthesized as part of the study:</i>		
3	Describe how the data were identified and how the data were accessed.	As mentioned in the Methods / “Data Sources” section, the details have been published previously.
4	Specify the inclusion and exclusion criteria. Identify all ad-hoc exclusions.	As mentioned in the Methods / “Data Sources” section, the details have been published previously.
5	Provide information on all included data sources and their main characteristics. For each data source used, report reference information or contact name/institution, population represented, data collection method, year(s) of data collection, sex and age range, diagnostic criteria or measurement method, and sample size, as relevant.	Available via online data source tools (http://ghdx.healthdata.org/gbd-2021/data-input-sources).
6	Identify and describe any categories of input data that have potentially important biases (e.g., based on characteristics listed in item 5).	As mentioned in the Methods, the details have been published previously.
<i>For data inputs that contribute to the analysis but were not synthesized as part of the study:</i>		
7	Describe and give sources for any other data inputs.	Available via online data source tools (http://ghdx.healthdata.org/gbd-2021/data-input-sources).
<i>For all data inputs:</i>		
8	Provide all data inputs in a file format from which data can be efficiently extracted (e.g., a spreadsheet as opposed to a PDF), including all relevant meta-data listed in item 5. For any data inputs that cannot be shared due to ethical or legal reasons, such as third-party ownership, provide a contact name or the name of the institution that retains the right to the data.	Available via online data source tools (http://ghdx.healthdata.org/gbd-2021/data-input-sources).
Data analysis		
9	Provide a conceptual overview of the data analysis method. A diagram may be helpful.	Flow diagrams of the overall methodological processes were available online (http://ghdx.healthdata.org/gbd-2021/code/nonfatal-12)

10	Provide a detailed description of all steps of the analysis, including mathematical formulae. This description should cover, as relevant, data cleaning, data pre-processing, data adjustments and weighting of data sources, and mathematical or statistical model(s).	As mentioned in the Methods / “Statistical Analysis” section.
11	Describe how candidate models were evaluated and how the final model(s) were selected.	As mentioned in the Methods / “Statistical Analysis” section, the details have been published previously.
12	Provide the results of an evaluation of model performance, if done, as well as the results of any relevant sensitivity analysis.	As mentioned in the Methods / “Statistical Analysis” section, the details have been published previously.
13	Describe methods for calculating uncertainty of the estimates. State which sources of uncertainty were, and were not, accounted for in the uncertainty analysis.	Methods / “Statistical Analysis” section
14	State how analytic or statistical source code used to generate estimates can be accessed.	Methods / “Statistical Analysis” section
Results and Discussion		
15	Provide published estimates in a file format from which data can be efficiently extracted.	Results, and online data tools (data visualization tools, and data query tools, http://ghdx.healthdata.org/gbd-2021)
16	Report a quantitative measure of the uncertainty of the estimates (e.g. uncertainty intervals).	Results, and online data tools (data visualization tools, and data query tools, http://ghdx.healthdata.org/gbd-2021)
17	Interpret results in light of existing evidence. If updating a previous set of estimates, describe the reasons for changes in estimates.	Discussion, paragraphs 1-7
18	Discuss limitations of the estimates. Include a discussion of any modelling assumptions or data limitations that affect interpretation of the estimates.	Discussion, paragraph 8

Supplementary Table 2: Mental diseases rate and number of DALYs, with 95% uncertainty intervals, by sex in 1990 and 2021								
	1990				2021			
	Male		Female		Male		Female	
	Total DALYs (95% UI)	DALYs rate per 100,000 (95% UI)	Total DALYs (95% UI)	DALYs rate per 100,000 (95% UI)	Total DALYs (95% UI)	DALYs rate per 100,000 (95% UI)	Total DALYs (95% UI)	DALYs rate per 100,000 (95% UI)
