

机构伦理委员会审查表

该实验利用生物信息学的方法，对从公共数据库获得的样本基因与临床信息展开研究。其中并未涉及任何人体相关的临床试验。因此，并未向相关机构伦理审查委员会提出申请。

Institutional review board statement

The experiment uses bioinformatics methods to conduct research on sample genes and clinical information obtained from public databases. It does not involve any human-related clinical trials. Therefore, no application was submitted to the ethical review committee of the relevant institution.
