SPECIFIC COMMENTS TO AUTHORS

The title is vague based on the fact that the topic has been dealt with by another author, therefore it is important to revise the topic to reflect the population of concerned that the manuscript will be addressing, as well as the additional knowledge that the manuscript will highlight to its readers. Also, the letter to the editor did not state the method of study, which makes it difficult to understand depth of what the authors of the manuscript will be highlighting and how this manuscript will be a novel contribution to this topic.
