

PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 93811

Title: Efficacy of fexuprazan compared with rebamipide in Korean patients with gastritis:
A matching-adjusted indirect comparison

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 06636742

Position: Peer Reviewer

Academic degree: MD

Professional title: Attending Doctor

Reviewer’s Country/Territory: Serbia

Author’s Country/Territory: South Korea

Manuscript submission date: 2024-03-18

Reviewer chosen by: AI Technique

SPECIFIC COMMENTS TO AUTHORS

The aim of the study was to compare the efficacy of the novel P-CAB fexuprazan with rebamipide for acute and chronic gastritis. The study is well and precisely written. P-CABs are emerging class of drugs and more data are greatly needed about their efficacy and safety profile, especially data extracted from comparison of novel medications like fexuprazan and other drugs for acid-related disorders. Therefore, this study would be of great importance for the readers of WJG.
