SPECIFIC COMMENTS TO AUTHORS
1. This research focused on Evaluation of jejunostomy in the palliative treatment of gastric cancer, after check the pubmed, very important. 2. Table 1 give different variables different points, following which rule? Have some references cited? 3. Figure 1 2 not very clear. 4. FOR Of the 363 patients with clinical stage IV CG evaluated, 80 (22%) patients underwent jejunostomy. You get results jejunostomy not benefit for patients was related with only 22% select jejunostomy, have you compare the difference between with jejunostomy patients and not with jejunostomy patients? 5. English need further polish.
