SPECIFIC COMMENTS TO AUTHORS
De Brito BB et al. conducted a review of the influence of the COVID-19 pandemic in the gastrointestinal oncology setting. In my point of view, this is not a well-structured literature review. 1. It is still controversial where the outbreak emerged. For example, a study found unexpected detection of SARS-CoV-2 antibodies in the prepandemic period in Italy (1). Thus, the first sentence ‘The SARS-CoV-2 outbreak that emerged in China in 2019’ should be expressed in a more rigorous way. 2. A systematic literature retrieval is needed for this topic, and please provide your search strategies. 3. Vaccine adverse events for cancer patients also arose patients’ concern. This should also be discussed. 4. Management of gastrointestinal cancer patients in clinical trials should also be discussed.
