

A**B**

Supplementary Figure 1 **A.**Quantitative analysis of GLUT1 protein levels and representative western blot showing the expression of GLUT1. **B.**The values are expressed as the fold induction compared to untreated cells. The data represent the mean \pm se for each condition ($bP < 0.01$ determined by Student's t test).

Supplementary Figure 2 Cell survival was measured with cell survival assay kit and Trypan blue stain

Supplementary Figure 3 Effect of siRNA interference on TGF-β receptors. Data reported as the mean \pm se of 3 independent experiments (N.S: not significant; Student's t test)
