To whom it may concern,

With regard to the case report "Esophageal squamous papillomas with focal dermal hypoplasia and eosinophilic esophagitis" the authors have no disclosures. This case report discusses use of the ERBE VIO APC system (ERBE USA Inc, Marietta, Georgia) and the proprietary PRECISE setting. The authors have no affiliation with ERBE. The views expressed in this article are those of the authors and do not reflect the official policies of the Department of Army/Navy/Air Force, Department of Defense, or U.S. Government. The identification of specific products or scientific instrumentation does not constitute endorsement or implied endorsement on the part of the authors, Department of Defense, or any component agency. While we generally excise references to products, companies, manufactures, organizations, etc. in government-produced works, this report presents a special circumstance when such product inclusions become an integral part of the scientific endeavor.

Very Respectfully,

Eric Pasman, MD
