PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 71227

Title: Bulbar conjunctival vascular lesion combined with spontaneous retrobulbar hematoma: A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 06113228

Position: Peer Reviewer

Academic degree: MD

Professional title: Associate Professor

Reviewer’s Country/Territory: Mexico

Author’s Country/Territory: China

Manuscript submission date: 2021-08-31

Reviewer chosen by: AI Technique

Reviewer accepted review: 2021-09-03 03:39

Reviewer performed review: 2021-09-15 19:14

Review time: 12 Days and 15 Hours

SPECIFIC COMMENTS TO AUTHORS

It is a case of an interesting case of intraocular hematoma exacerbated by the presence of a vascular lesion. It is worth highlighting more the clinical and imaging characteristics to contrast between high and low flow malformations, as well as with non-involuting hemangiomas. Although the discussion is extensive, few cases (and their respective references) of vascular malformations are contrasted. It is necessary to emphasize the involvement of the vascular dynamics of these lesions in the ocular region.
