COMMENTS TO AUTHORS

Title: Genomic Microarrays in Prenatal Diagnosis Manuscript ID: 00631992 (World Journal of Medical Genetics) This manuscript aims to the discussions on genomic microarrays in prenatal diagnosis by reviewing the literature and existing guidelines, and providing opinions on possible future developments and recommendations. This is a well written manuscript. I have two comments: 1. The description in the Data and Literatures section is difficult to follow. It will be beneficial to provide a table or tables to summarize the key results. 2. The issues and recommendations in the Guidelines section can be presented in a bullet point list or similar format.
