SPECIFIC COMMENTS TO AUTHORS
In this Manuscript, titled “Diabetes mellitus contribution to the remodeling of the tumor microenvironment in gastric cancer”, Rojas A. et al. highlight the mechanistic contributions of diabetes to the remodeling of tumor microenvironment in gastric cancer. The topic is interesting for the scientific community. The paper is well-structured and written. My only advice to authors concerns the use of figures. The subject matter is complex and detailed, and the addition of more pictures or tables would facilitate consultation. Figure 1 alone does not represent all the sections of paragraph III.
