Name of journal: World Journal of Gastroenterology

ESPS manuscript NO: 20170

Title: Surgical care quality and oncologic outcome after D2 gastrectomy for gastric cancer

Reviewer's code: 00182833

Reviewer's country: Egypt

Science editor: Yue-Li Tian

Date sent for review: 2015-06-03 08:10

Date reviewed: 2015-06-30 22:29

Table with 4 columns: CLASSIFICATION, LANGUAGE EVALUATION, SCIENTIFIC MISCONDUCT, CONCLUSION. It contains checkboxes for various evaluation criteria like 'Grade A: Excellent', 'Priority publishing', 'Google Search', etc.

COMMENTS TO AUTHORS

this article is evaluating the effectiveness and quality of life after D2 resection for gastric cancer ... it is conducted on 109 patients and also you performed a 5 years follow up . This adds to the value of the research i just have some minor inquires : 1. i think the article should be revised by a native speaker ... there are some minor but misleading expressions ; fifth line from the introduction (gained in popularity) better to be written as (gained popularity) 2. we need some details about which patients were given the neoadjuvant chemotherapy 3. again , regarding the neoadjuvant chemotherapy , we need to know about the impact of neo adjuvant chemotherapy on prognosis for patients undergoing a D2 resection 4.regarding the steps of the operation , i need to know why are you routinely removing gall bladder ?
