Evidences supporting the vascular etiology of post-double balloon enteroscopy pancreatitis: Study in porcine model

Latorre R *et al.* Vascular etiology of post-DBE pancreatitis

Rafael Latorre, Octavio López-Albors, Federico Soria, Esther Morcillo, Pilar Esteban, Enrique Pérez-Cuadrado Robles, Enrique Pérez-Cuadrado Martínez

Abstract

Double balloon enteroscopy (DBE) is an endoscopic technique broadly used to diagnose and treat small bowel diseases. Among the associated complications of the oral DBE, post-procedure pancreatitis has taken the most attention due to its gravity and the thought that it might be associated to the technique itself and
