

(a)

**ANKRD26 (Hierarchical differentiation tree)**

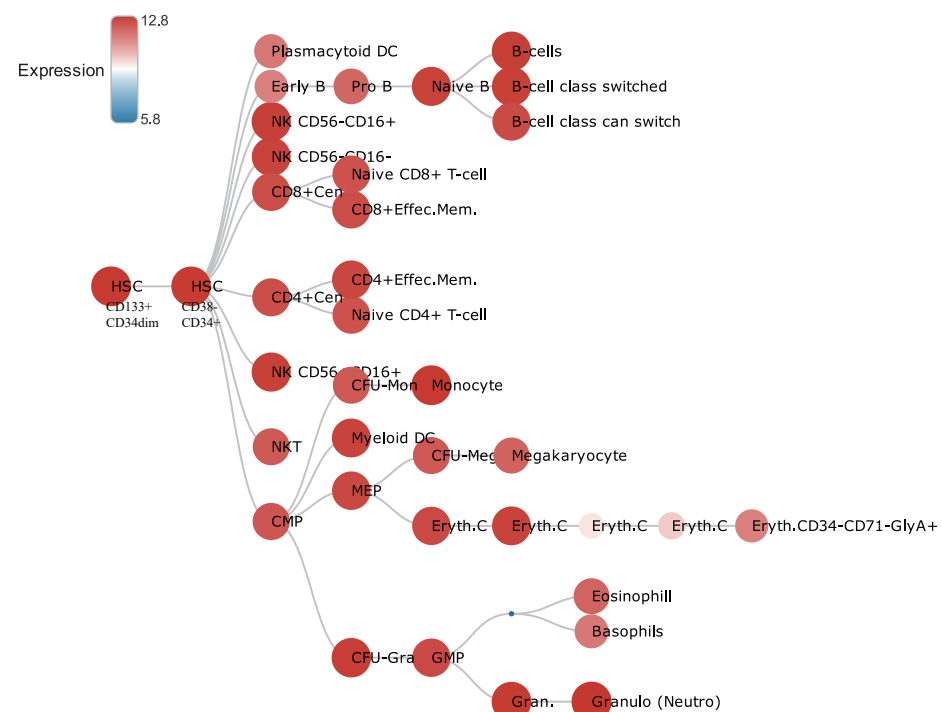

(b)

**GATA2 (Hierarchical differentiation tree)**

(c)

**RUNX1 (Hierarchical differentiation tree)**

(d)

**FLI1 (Hierarchical differentiation tree)**

**Figure S1.** Hierarchical differentiation trees of ANKRD26, GATA2, RUNX1, and FLI1. ANKRD26 (a) and GATA2 (b) expression are decreased with myeloid differentiation. RUNX1 (c) and FLI1 (d) expression have no obvious difference with myeloid differentiation.
