SPECIFIC COMMENTS TO AUTHORS

1. The trials involved are all from Iran and China, which means the conclusion of the study could be only applied to Asia population. I suggest to revise the title to point out this, like Participant attrition and perinatal outcomes in prenatal vitamin D supplemented gestational diabetes mellitus patients in Asia: A systematic review and meta-analysis of randomized controlled trials. And so does the manuscript. 2. What does CS risk mean? the rate of CS occurrence? or the risk of CS, such as postpartum bleeding. It should be identified.
