Edit article

Using images from Radiopaedia in your presentations is not only OK but is actively encouraged. Radiopaedia is all about sharing our knowledge and cases and by so doing, makes it easier to teach and to learn from each other.

To download an image, just click the download icon (little cloud with down arrow). This will not only allow you to download the image but also make it trivially easy to correctly attribute it; just copy the suggested attribution and paste it into your presentation/project.

You don't have to use this exact attribution, provided you do attribute the case to the contributor and to Radiopaedia. We also strongly suggest you include the [Radiopaedia identification number \(rID\)](#) so that others can easily find the whole case.

It is important to note that use is limited to non-commercial endeavors. We know that whether something is commercial or not is not always obvious. If in doubt, contact us at license@radiopaedia.org.

You can read more [here](#) about attributing content correctly and the Creative Commons license we use.

You are free to:

Share — copy and redistribute the material in any medium or format for any purpose, even commercially.

You are free to:

Share — copy and redistribute the material in any medium or format for any purpose, even commercially.

Adapt — remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

 **Attribution** — You must give [appropriate credit](#), provide a link to the license, and [indicate if changes were made](#). You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

 **ShareAlike** — If you remix, transform, or build upon the material, you must distribute your contributions under the [same license](#) as the original.

No additional restrictions — You may not apply legal terms or [technological measures](#) that legally restrict others from doing anything the license permits.

Notices:

You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable [exception or limitation](#).
