JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

Although some important considerations of the reviewers (for example the suggestions and critiques done by reviewer 3) was not responded sufficiently by the author, I would recommend publication of this manuscript. It would be better if the author would address all aspects of the critiques of the reviewers. (For example shortening the introduction section, rearrangement of the discussion etc). The subject is interesting. It can be cited by the articles published in other international ophthalmology journals. I recommend publication. Thank you
