SPECIFIC COMMENTS TO AUTHORS

1. The English need improvement since there are few grammatical and syntax errors in the manuscript. For example, the words “renin angiotensin” may be as “the rennin-angiotensin”; “being” as “to be”. The grammar mistakes which are not mentioned here also to be checked and corrected properly. 2. There are some typing mistakes as well, and authors are advised to carefully proof-read the text. For example, the words “training induced” may be as “training-induced”; “energy sensing” as “energy-sensing”; “though” as “through”; “exercise induced” as “exercise-induced”; “angiotensin converting” as “angiotensin-converting”; “nascently” as “nascent”; “renin angiotensin” as “rennin-angiotensin”; “agonism” as “agonist”. The typos not mentioned here also to be checked and corrected properly. 3. In the introduction, the authors may mention the month instead of giving “has to date” since the data may be outdated at the time publication. 4. The authors are encouraged to include the database, search engine, keywords used etc., which may be included in the introduction section since it is review article. 5. Make a word abbreviated in the article that is repeated at least three times in the text, not all words need to be abbreviated. For example, caloric restriction (CR). 6. The authors are encourage to include the potential research gap, limitation, future recommendation and etc in brief, which is absent in this manuscript.

SPECIFIC COMMENTS TO AUTHORS

Some grammatical style should be polished, and the anti-virus mechanism of exercise needs to be described in detail
