SPECIFIC COMMENTS TO AUTHORS

The case of PNET of the prostate presented in this study will contribute to the literature as it is a rare case. The authors have adequately reviewed the literature with this case report. Common uses of some terms used in the article should be preferred (for example, “contrast-enhanced scan” instead of “post-contrast scan”; “tympanitic” instead of “tympanic”; “cystic-solid tumor” instead of “cystic solid tumor”)
