Name of journal: World Journal of Clinical Cases

Manuscript NO: 70045

Title: Mixed neuroendocrine-nonneuroendocrine neoplasm of the ampulla: Four case reports and a literature review

Provenance and peer review: Unsolicited manuscript; externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 05429635

Position: Peer Reviewer

Academic degree: MBBS, MS

Professional title: Assistant Professor

Reviewer’s Country/Territory: Nepal

Author’s Country/Territory: China

Manuscript submission date: 2021-07-20

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2021-07-22 06:53

Reviewer performed review: 2021-07-22 07:10

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

1) This is a valuable article that summarizes the clinical experience of four rare cases of mixed neuroendocrine-nonneuroendocrine neoplasm of the ampulla. However, it has been shown that the prognosis is poor and preoperative diagnosis is difficult. Therefore, the authors should describe the significance of this four-case report, compared to the previously reported 16 cases. 2) The description that “adjuvant chemotherapy can improve the prognosis” in conclusion is inappropriate because none of the four cases suggest that adjuvant chemotherapy may be effective.
