

### Supplementary Table 1 The selection of internal reference gene

Internal reference genes	Mean $\pm$ SD	CV%
18S	15.97 $\pm$ 0.846	5.30%
GAPDH	25.71 $\pm$ 1.095	4.26%
$\beta$ -actin	23.82 $\pm$ 1.123	4.71%
Tub	34.39 $\pm$ 1.126	3.27%
RPII	31.94 $\pm$ 1.158	3.62%

SD, standard deviation; CV, coefficient of variation.

### Supplementary Figure 1 CT values of internal reference candidate genes.

### Supplementary Figure 2 CT values of internal reference gene expression in plasma of gastric cancer patients and healthy donors.
