Gastric and duodenal polyps in familial adenomatous polyposis patients: Conventional endoscopy vs virtual chromoendoscopy (fujiinon intelligent color enhancement) in dysplasia evaluation

Gabriele Lami, Andrea Galli, Giuseppe Macri, Emanuele Dabizzi, Maria Rosa Biagini, Mirko Tarocchi, Luca Messerini, Rosa Valanzano, Stefano Milani, Simone Polvani
Prevalence of Gastric and Duodenal Polyps and Risk Factors for Duodenal Neoplasm in Korean Patients with Familial Adenomatous Polyposis. So Youn Park*, Ji Kon *.... grade as severe dysplasia, Spigelman score 3 points. ... or follow-up endoscopy and among them, fundic gland polyps.

Endoscopic management of nonampullary duodenal polyps - NCBI

The majority of sporadic duodenal adenomas are flat or sessile and occur in the ... endoscopic submucosal dissection, familial adenomatous polyposis, ... They usually follow a benign course but dysplasia and malignancy have ... The lifetime risk of duodenal cancer in patients with FAP is estimated to be 3–5% [Bulow et al.

Nonampullary duodenal adenoma: Current understanding of its ...

2016年1月14日 - The techniques for endoscopic resection of duodenal adenoma ... Surgery is indicated for FAP patients with severe polyposis or ... Sporadic duodenal polyps are uncommon, found in up to only 5% of .... Kiesslich et al[28] demonstrated that conventional chromoendoscopy with indigocarmine detected a ...
