Clinical Trials Study

Are stapler line reinforcement materials necessary in sleeve gastrectomy?

Ibrahim Sakcak

Abstract

AIM: To investigate the efficiency of use of staple line reinforcement materials on decreasing complications related to sleeve gastrectomy.

METHODS: In this retrospective study, we analyzed 84 patients who had sleeve gastrectomy due to obesity between April 2012 and April 2015. Sleeve gastrectomy procedure was performed in patients with a body mass index (BMI) more than 40 kg/m², and the ones with a BMI between 32 and 40 kg/m² in presence of comorbid
