## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**Manuscript NO:** 36116

**Title:** Construction of esophageal cancer specific ceRNA network based on the miRNA, lncRNA and mRNA expression data

**Reviewer's code:** 03552525

**Reviewer's country:** Japan

**Science editor:** Ke Chen

**Date sent for review:** 2017-09-13

**Date reviewed:** 2017-09-16

**Review time:** 2 Days

### COMMENTS TO AUTHORS

The present study is very important and interesting, but authors should revise to publish. 1. Authors should write abbreviations to first place in abstract. 2. Authors should show number of patients with 8 mRNA each other. 3. Could you tell me the relationship between "TNM classification or recurrence" and 8 mRNA expression if possible. 4. Paragraph 1-3 in discussion section are not discussion, but introduction. Authors should delete these, or write these in introduction section. 5. Could you tell me the concrete plan for using these data clinically, if you think?

**COMMENTS TO AUTHORS**

Thanks for giving opportunity to me to review this article. Micro RNAs are novel and important proteins for cancer biology. There are restricted number of study about this topic in literature. Long noncoding RNAs (lncRNAs) is a novel kind of miRNAs that can be important to understand the cancer biology of Squamous cell cancer of the esophagus. It can be considered for publication after minor corrections; 1. why did you enroll the patients with breast cancer in this study, please clarify. 2. please discuss the importance of miRNAs in other cancer types in the discussion section. 3. Reference 1 and 2 are same. Please control it, and also correct the other references according to the journal's rule.
