Hepatic metastases from gastric cancer: A surgical perspective

Guido Alberto Massimo Tiberio, Franco Roviello, Annibale Donini, Giovanni de Manzoni; on behalf of the Italian Research Group for Gastric Cancer

Abstract: Management of patients with hepatic metastases as the sole metastatic site at diagnosis of gastric cancer (synchronous setting) or detected during follow-up (metachronous) is controversial. The prevailing attitude in these cases is passive, leading to surgical palliation and, possibly, to chemotherapy. Authors focused this editorial in order to promote a more pragmatic attitude. They stress the importance
