**Rotator cuff tears: An evidence based approach**

**Senthil Nathan Sambandam, Vishesh Khanna, Arif Gul, Varatharaj Mounasamy**

### **Abstract**

Lesions of the rotator cuff (RC) are a common occurrence affecting millions of people across all parts of the globe. RC tears are also rampantly prevalent with an age-dependent increase in numbers. Other associated factors include a history of trauma, limb dominance, contralateral (C/L) shoulder, smoking-status,
