COMMENTS TO AUTHORS

The manuscript is well-written and includes a lot of useful information from the point of view of a clinician. It would be interesting for the reader to know which of the aforementioned studies, especially involving surgical results, have a high degree of evidence, or even to compare between studies according to the degrees of evidence. In such a way, practicing surgeons may make more informed decision in the future.

COMMENTS TO AUTHORS

Please add an algorithm scheme for the surgical options and management of the exostoses.

COMMENTS TO AUTHORS

I read the manuscript named " Exostoses of the external auditory canal". (ESPS Manuscript NO: 15584) and my recommendations are as follows. Abstract: Well, summarizing the topic. Introduction: Adequate. Topics has been discussed with all aspects. References: References are appropriate and updated. Tables: Tables are reflects the major findings of the study, and they are appropriately presented. This manuscript was well-written and documented. This study is clearly presented . Also, this manuscript gives additional new knowledge to the literature. I think that this manuscript is suitable and worth to be published in World Journal of Otorhinolaryngology.
