COMMENTS TO AUTHORS

I congratulate the author for a well compiled review. - According to culture anthropology, there exist two contrasting cultures- shame and guilt cultures. Author may also include this aspect as well. - Care giving in psychiatric settings also has been studied from a cultural aspects(Morrison EF. The culture of caregiving and aggression in psychiatric settings. Arch Psychiatr Nurs. 1998 12(1):21-31). I believe a review on this aspect might add more value to this paper. - The "methodological issues" section could be bettered. Heterogeneity in the tools to measure constructs like problem solving, appraisals etc., could have been addressed.

COMMENTS TO AUTHORS

Excellent review of a very under-research topic addressing an important issue of helping to those who often suffers in silence
