Advances and challenges in laparoscopic surgery in the management of hepatocellular carcinoma

Ziogas IA *et al.* Advances and challenges in laparoscopic surgery for the management of HCC

Ioannis A Ziogas, Georgios Tsoulfas

Abstract

Hepatocellular carcinoma is the fifth most common malignancy and the third most common cause of cancer-related mortality worldwide. From the wide variety of treatment options, surgical resection and liver transplantation are the only therapeutic ones. However, due to shortage of liver grafts, surgical
