SPECIFIC COMMENTS TO AUTHORS
The manuscript of “Case report: delayed arterial symptomatic epidural hematoma on the 14th days after posterior lumbar interbody fusion” by Shen-Shen Hao and co-authors aims to describe the treatment of a sporadic rare patient with delayed arterial symptomatic epidural hematoma on the 14th day after posterior lumbar interbody fusion. The authors analyze possible causes of delayed arterial symptomatic epidural hematoma, introduce treatment methods and explore preventive measures. The case report may encourage other clinicians to increase their vigilance for a symptomatic epidural hematoma and provide recommendations for its diagnosis and management. The manuscript as a whole and all its section are well written and structured. The Discussion is well organized and detailed. The manuscript may be accepted for publication in its present form.
