

Supplementary Figure 1 Serum amylase and lipase activity were measured on day 1 after the induction of the acute pancreatitis model. A: Serum amylase activity evaluation; B: Serum lipase activity evaluation. Representative results from three independent replicates are shown. $^aP < 0.05$, $^bP < 0.01$, $^cP < 0.001$. Data are presented as the mean \pm SD. AP: Acute pancreatitis; MAP: Mild acute pancreatitis; SAP: Severe acute pancreatitis.
