### Prognostic factors of hepatocellular carcinoma patients ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3971316>

We aim to investigate the clinical characteristics and prognostic factors of Hepatocellular Carcinoma

(HCC) patients treated by transarterial chemoembolization (TACE) in Chinese cohort. A total of 2,493

HCC patients treated by TACE were included in this retrospective study.

Oct 07, 2019 - Hepatocellular carcinoma (HCC) is the fifth most common cancer worldwide and also

common in Thailand. Prognosis of HCC is very poor. Staging and clinical prognostic factors is a

complex issue compared to other cancer entities. Survival depends on baseline demographic, laboratory,

staging and treatment modalities.

Author: Chanchai Charonpongsuntorn Publish Year: 2019

### Evaluation of prognostic factors on ... - PubMed Central (PMC)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4258583>

Dec 07, 2014 - Core tip: Tumor recurrence after surgical resection for hepatocellular carcinoma is an

obstacle to long-term survival. Thus, selection of appropriate patients is important, especially those with

advanced tumors. Several factors responsible for the high recurrence and poor survival rates after surgical

resection have been described.
