SPECIFIC COMMENTS TO AUTHORS
Though this paper is well written, unfortunately, this have not been able to afford it a priority adequate for publication.

Dear Authors, The authors have compiled the subject adequately on a theoretical basis. However, it would be beneficial to support the study with radiological imaging in order for the reader to better understand the subject in the diagnosis part. For example, it needs to be supported by visuals (drawing, MRI or CT images) for the reader to better understand the concept of DESH, the Evans index, zEI, BVR and Rad Scale. Best regards,
