SPECIFIC COMMENTS TO AUTHORS

This paper is a comprehensive review about the current management of esophageal cancer. However, the described alternatives to surgical management are mainly for early neoplasms and may be this could be specified in the title to avoid misunderstanding.

Moreover, a word about palliative treatment in case of non resectable cancers could be added. Apart these suggestions, the manuscript is well written and gives a broad overview of this intriguing issue. References are updated. If possible, a table concerning the different treatments, when they were introduced, their main indications and role, might be helpful and enrich the paper.
