Surgical treatment of a rare complication after endoscopic stent placement for anastomotic leakage after esophageal resection

Marjan Klinkert, Mechteld C de Jong, Meindert N Sosef, Annick B van Nuen, Henricus J Belgers

Abstract
The best approach to achieve cure in esophageal cancer is a combination of chemoradiation and surgery. However, complications occur in half of patients. The current report, reports a rare but severe complication: complete obstruction of the esophagus, induced by preoperative chemoradiation therapy. Normally, strictures are treated...
