PEER-REVIEW REPORT

Name of journal: World Journal of Clinical Cases

Manuscript NO: 71516

Title: Successful treatment of aortic dissection with pulmonary embolism: A case report

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 02636483

Position: Peer Reviewer

Academic degree: FCPS, FRCP, MBBS, MD, MSc

Professional title: Professor

Reviewer’s Country/Territory: Pakistan

Author’s Country/Territory: China

Manuscript submission date: 2021-09-10

Reviewer chosen by: Qi-Gu Yao (Online Science Editor)

Reviewer accepted review: 2021-12-07 11:53

Reviewer performed review: 2021-12-07 11:58

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Dear author, The article represents the clinical case of successful therapy of aortic dissection with pulmonary embolism. The article is written with the acceptable English-speaking adduction of the arguments. The article is sufficiently novel and very interesting to warrant publication. All the key elements are presented and described clearly. The most discussable options in the article are: 1) Please correct all your minor grammar errors and typos. 2) The case is quite simple and not truly challenging for the daily practice. Your scenario was quite benign merely because the patient was initially stable hemodynamically and there were no indications for thrombolysis (please mention the Guidelines in the main text that you use in your routine clinical practice). It might be nice to see at least more clinical data including ECG, echo, lab results and so on (please, more numbers and justification of your clinical strategy) — we do not know even a level of the blood pressure in the pulmonary artery(!!!). Is there an overload of the right chambers? The content is simply not informative enough to draw any conclusions. I would kindly suggest also to provide a reader with the higher quality images. 3) Discussion: if you mention any other cases, why there are no references? Please, underline the novelty and your message! Frankly, I do not understand the message of your clinical case. It must be emphasized. What have we suppose to learn after reading of your article? I do not have an answer — due to lack of the critical clinical information, this case does not sound at all.
