### AU-rich elements-binding proteins in colorectal cancer

Legrand N *et al.* AUBPs in colorectal cancer

Noémie Legrand, Dan A Dixon, Cyril Sobolewski

#### Abstract

Trans-acting factors controlling mRNA fate are critical for the post-transcriptional regulation of inflammation-related genes but also oncogene (ONC) and tumor suppressor (TS) expression in human cancers. Among them, a group of RNA-binding proteins called "Adenylate-Uridylate-rich elements binding proteins" (AUBPs) control mRNA stability or translation through their binding to AU-rich elements (ARE)
