### COMMENTS TO AUTHORS

thank you for your article a good overview of current literature, including the newer techniques/fads however, does not add anything novel to literature minor language editing required, particularly in regard of grammar/punctuation and its consistent use e.g. just for the introduction - morbidity.the (no space) - percent - as a (too many spaces) ('The methods and used instruments will be described, and the results of the techniques will be discussed.' superfluous sentence. please condense or remove)

### COMMENTS TO AUTHORS

I appreciate your very interesting review. However, I am afraid it is much more suitable for surgical teaching than for a scientific journal. A much higher scientific significance could be reached with a meta-analysis or a proper systematic review comparing the several methods to deal with anastomotic leaks.

### COMMENTS TO AUTHORS

I think that the article contents are good but a brief discussion after the overview and before conclusion is lacking.
