**SPECIFIC COMMENTS TO AUTHORS**

Eva M. Kruger et al. present a miniature narrative review of the relationship between air pollution, diabetes mellitus, and thyroid cancer, it's very interesting. After reviewing the data, there is a large literature on the relationship between air pollution, diabetes and thyroid cancer, but less literature addressing the relationship between the three, thus making the authors' arguments relatively novel. Throughout, the manuscript has some minor deficiencies, which the authors are advised to revise.

1. It is suggested that "Pathogenesis" be listed separately as a subheading at an appropriate place in the manuscript, otherwise it looks messy.

2. It is suggested that the limitations of this review be added.

3. It is suggested that your thoughts on the future be briefly described.

4. About the format: 1) Many places in the manuscript are missing spaces (although this may be due to file downloads, the authors are advised to revise carefully); 2) Some references from page 13 onwards have square brackets and inconsistent formatting; 3) The format of references at the end of the paper is not standardized according to the guidelines of World Journal of Diabetes.

5. About spelling: 1) "from 1991-2022" on page 5 is irregularly written; 2) "PM" on page 5 should be explained correctly.
when it first appears, not on page 6.
PEER-REVIEW REPORT

Name of journal: World Journal of Diabetes

Manuscript NO: 82878

Title: Type 2 Diabetes and Thyroid Cancer: Synergized Risk with Rising Air Pollution

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer’s code: 05126185

Position: Editorial Board

Academic degree: PhD

Professional title: Associate Professor

Reviewer’s Country/Territory: South Korea

Author’s Country/Territory: United States

Manuscript submission date: 2022-12-28

Reviewer chosen by: Dong-Mei Wang

Reviewer accepted review: 2023-02-15 22:40

Reviewer performed review: 2023-02-21 05:37

Review time: 5 Days and 6 Hours

**SPECIFIC COMMENTS TO AUTHORS**

I am really grateful to review this manuscript. In my opinion, this manuscript can be published once some revisions are done successfully. This study reviewed articles on the associations among air pollution, diabetes and thyroid disease. I would argue that this is a good start. However, the flow diagram and the summary tables of study methods, sample size, data type, model performances and important predictors need to be added for better external validation.
