COMMENTS TO AUTHORS

In the recent paper the authors reviewed molecular mechanisms underlying urolithiasis and DHA nephropathy, along with the issues of diagnosis and management of APRT deficiency. The manuscript is well-written and worth to read. This reviewer has some suggestions which would probably increase the value of the present review. * I couldn't see any references. Recent references should be added and cited appropriately throughout the manuscript. * It would be more descriptive for readers if the authors added additional figures describing the molecular mechanisms of the disease and management (summarizing the diagnosis and treatment stages). * The manuscript includes only the legend but not the figure 1. The authors should add Figure number 1 in the manuscript.
