SPECIFIC COMMENTS TO AUTHORS
This is basically a review article of endoscopic techniques to revise bariatric surgery. It
would be more important a piece of literature if a meta-analysis or systematic review were done for each section.

SPECIFIC COMMENTS TO AUTHORS
Bulajic M et al. reviewed the indication, selection and feasibility of different endoscopic
techniques that could be used in the management of weight regain following primary bariatric surgery. This review is comprehensive and well-organized. There are some spelling and grammatical errors, the author should check it carefully.
