SPECIFIC COMMENTS TO AUTHORS
An interesting case report of an ectopic tissue calcification after undergoing abdominal surgeries. 1. What conservative therapy was applied to the 1st patient? How were the symptoms managed? Is there an alternative therapy for HO to remove the ectopic tissue calcification other than surgery? 2. The introduction to this case report needs further elaboration. If I may suggest, the 1st paragraph of the discussion should be included in the introduction instead of the discussion section. 3. Perhaps the term “case series” or “a report of two cases” is more suitable for this report since there’s more than 1 case of HO reported. Best of luck on your submission.
