

Biostatistics Review Statement

This letter is a statement that the statistical methodology applied in the research study titled:

Haematology results, inflammatory haematological ratios, and inflammatory indices in cervical cancer: How is the difference between cancer stage?

has been reviewed and assessed for its appropriateness, accuracy, and adherence to standard biostatistical practices. The review followed relevant principles for statistical analysis in biomedical research. The study's analysis comprised the proper use of descriptive and inferential statistics, the selection and application of statistical tests, and the evaluation of data significance (p-values).

This statement is a confirmation that the biostatistical review has been completed by a qualified biostatistician (Certificate ID Number: 217e91936c1b44669c4aa6520f17ef45 by Cognitive Class-IBM Developer Skills Network).
