COMMENTS TO AUTHORS

In the present case report the authors have described 3 children with endobronchial adenoma and a history of recurrent pneumonia. The authors suggested early bronchoscopic evaluation in patients with recurrent pneumonia. This is a nice case report. Minor language errors should be corrected.

COMMENTS TO AUTHORS

A nice case report about endobronchial tumor presented with pneumonia. The title should be changed to case report and not case series as the number was 3 patients, the authors should mention the number recurrent attacks of pneumonia in each case, otherwise it was a persistent pneumonia.
