

Supplementary Figure 1 The receiver operating characteristic curves for predicting overall survival. A-C: The receiver operating characteristic (ROC) curves illustrate the predictive abilities of the nutritional immune-inflammatory status (NIIS) score and the eight indicators for the 1- (A); 3- (B); and 5-year (C) OS in the training set; D-F: The ROC curves illustrate the predictive abilities of the NIIS score and the eight indicators for the 1- (D); 3- (E); and 5-year (F) OS in the validation set.
