SPECIFIC COMMENTS TO AUTHORS

"The role of $\gamma\delta$ T cells in liver diseases and its relationship with intestinal microbiota" is an interesting paper. Authors have treated the novel argument clearly and exhaustively. However, I think that the last paragraph (LIVER/INTESTINAL $\gamma\delta$ T CELLS AND GUT MICROBIOTA) should be expanded and deepened. In fact, the matter of intestinal microbiota appears in the title of the paper but now it takes only a little part of the whole article.

SPECIFIC COMMENTS TO AUTHORS

The mini-review on the gammadelta T cells is timely to arouse interest. However, in addition to the role of gammadelta T cells itself, the role in the context of whole immune system should be briefly provided.
