September 16, 2012

Dear Editor,

Title: Superficial esophageal lesions detected by endoscopic ultrasound enhanced with submucosal edema

Author: Jian-jun Li, Hong-bo Shan, Long-jun He, Huan Xiong, Li-ming Chen, Guo-liang Xu, Xiao-hai Li, Xin-xin Huang, Guang-yu Luo, Yin Li and Rong Zhang

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 4921

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated and up to 30 references were listed. In addition, this manuscript was edited by American Journal of Experts and got a certificate of Grade A.

2 Revision has been made according to the suggestions of the reviewer

(1) Reviewer #1: *The authors present interesting data on the accuracy of EUS assessment of thermal esophageal burns, facilitated by submucosal edema in a canine model. Further studies will be required to determine the utility of submucosal fluid enhanced EUS examination of esophageal carcinoma.*

Answer: Yes, further investigation is ongoing by our team and focusing on the role of submucosal saline to better staging early esophageal cancer combined with EUS. This manuscript was just a fundamental research.

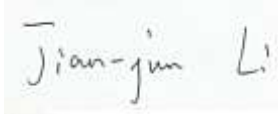

(2) Reviewer #2: *The paper is interesting and well writing. I think it should be accepted for publication.*

Answer: Thank you for your priority about this manuscript.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink on a light-colored background. The signature reads "Jian-jun Li" in a cursive, slightly slanted script.
