COMMENTS TO AUTHORS

The authors review the main aspects of Prediabetes with special reference to possible therapies. This paper deals with an interesting topic and it is on the whole well organized and well written. In the Introduction, I would like authors to present better the scientific background and, therefore, to describe the aims of the paper.

COMMENTS TO AUTHORS

The current review is a quite well written overview about prediabetes and clinical implications for treatment. There are some typos within the manuscript which need to be corrected. In addition, the authors need to make sure that the reference format matches with the requirements.
