Use of biologic agents for rheumatic diseases in pregnancy

Yesim Garip

Abstract

Biologic agents have ushered ⁴⁰ a new era in the treatment of inflammatory rheumatic diseases. In recent years, several biologic agents ³⁹ have been approved by Food and Drug Administration (FDA) ⁵ and have significantly improved outcomes for patients with immune mediated inflammatory disorders including rheumatic and inflammatory bowel diseases. The most common used biologic therapeutic agents ⁴ are tumor necrosis factor (TNF) inhibitors (etanercept, infliximab, adalimumab, certolizumab pegol, and golimumab), an interleukin (IL)-6 inhibitor (tocilizumab), an
